Historical Atlas of Paris (Atlas historique de Paris)

Les Editions Persee. France. Softcover. 220 pages. ISBN 9782823128918. In French. 2019.

The original maps of this historical atlas shed light, chronologically, on the evolution of space and the Parisian landscape in all its components - housing, churches, mansions, pathways, gardens, cultivated spaces, since the Gallo-Roman city until 1900. Analyses by themes (the precincts, the Seine, the Church, the University, etc.) and by neighborhoods complete this global approach to the spatial influence of the capital.

Bosatlas of Sustainability (De Bosatlas van de duurzaamheid)

Noordhoff uitgevers. Netherlands. 152 pages. ISBN 9789001120283. In Dutch (Netherlandic). 2019.

The Bosatlas of Sustainability maps out complex and current phenomena of the effects of humans on the earth. For example, in the form of climate change, the depleting of resources, loss of biodiversity, and shortage of fresh water. The atlas also provides insight into the agreements that have been made internationally such as the Paris Climate Agreement. The emphasis is mainly on a fleet survey of concrete measures that citizens, governments and companies can take to reduce their footprint. This Bosatlas provides clear and colorful maps and infographics with insight into sustainability and sustainable development in the Netherlands.

Singing the Trail: The Story of Mapping Aotearoa New Zealand

Allen & Unwin. New Zealand. Hardcover. 276 pages. ISBN 9781760633592. In English. 2020.

The very first maps were oral maps made by early Polynesian and Maori settlers which were waypoints, described as "survey pegs of memory," lists of places in songs, chants, karakia, and stories that showed direction. Hundreds of years later, the Dutch Abel Tasman sailed here and made the first attempt at a physical map; he was followed more than 100 years later by Cook, whose map was much more detailed as he circumnavigated the country. Once the detail of the coastline was filled in, more detailed maps of the interior were made by those in search of resources to exploit. A clever look at New Zealand history and also at the intriguing tradition of map making.

Trade, Popular and Reference Maps and Atlases

Featured Publisher: Kalimedia

Stephan Hormes and Silke Peust, the creators of the 'Atlas of True Names', spent time cogitating on how best to present the double-sided folding format as a single-sided wall map. The map is at the centre of the poster, framed by the derivations so that any viewer can pick out names and find their original meaning without ever losing sight of the original map. The 'Atlas of True Names' reveals the etymological roots, or original meanings, of the familiar terms on today's maps of the World, Europe, the British Isles and the USA. Atlas of True Names: Etymological Map: Europe

ISBN: 9780755830008. Map. 2008. In English. 1 sheet.

"The Atlas of True Names reveals the etymological roots, or original meanings, of the familiar terms on today's maps of the World and Europe. For instance, where you would normally expect to see the Sahara indicated, the Atlas gives you "Sea of Sand", derived from Arab. es-sahra "desert, sea of sand". The 'True Names' of 2300 cities, countries, rivers, oceans and mountain ranges are displayed on these three fascinating maps, each of which includes a comprehensive index of derivations. Etymology, (OGr. etymon "true sense" and logos "speech, oration, discourse, word") is the study of the origin and history of words. For the first time, the Atlas of True Names uses etymology to give us an unusual insight into familiar geographical names – with intriguing results..."
