Atlas of the Holocene Netherlands : landscape and habitation since the last ice age

Amsterdam University Press, Netherlands. Hardcover. 96 pages. ISBN 9789463724432. In English. 2020.

The landscape of the Netherlands has been changing constantly since the end of the last ice age, some 11,700 years ago. Where we walk today was once a polar desert, a river delta or a shallow sea. The end of the last ice age marked the beginning of a new geological period - the Holocene, the relatively warm geological epoch in which we are still living today. The 'Atlas of the Holocene Netherlands' contains special maps, supplemented by archaeological and historical information.

Geoloski atlas Slovenije : 2. izdaja

Geosz, Slovenia. Hardcover. 128 pages. ISBN 9789616498555. In Slovenian. 2018.

On the occasion of the 70th anniversary of its operation, the Geological Survey of Slovenia published the Geological Atlas of Slovenia in October 2016, which contains contributions by 44 authors from the ten most important Slovenian institutions dealing with geological data. As the stock soon ran out, the 2nd revised and supplemented edition was released in 2018. The book is a comprehensive collection of geological and all geologically related data in Slovenia, and only a few countries can boast of such a collection in book form.

The maps are divided into 11 thematic chapters: basic geological maps, geophysical, geothermal, hydrogeological, geochemical, hydrogeochemical maps, maps of mineral resources, engineering-geological maps and maps of geological hazards, geomorphological maps, pedological maps and maps of geological natural heritage. 59 maps with short descriptions are presented, supplemented by professional literature. Most cards are at a scale of 1: 1,000,000, and some are at a scale of 1: 1,800,000. The atlas is written bilingually, in Slovene and English.

Southern California G1 Map

ISBN: 9780984559077. 2017. In English. 1 sheet.

This map covers every good paved ride and a selection of dual-sport roads from the Mexico border north to roughly Monterrey on the Pacific coast and Bishop on the Eastern slope of the Sierras. In between there is every type of road you can imagine, including what are called Paved Mountain Trails. These PMTs are narrow, rough strips of asphalt are not for all types of bikes, but bring the right tool and it's hard to imagine having more fun on two wheels. Waterproof, tear-resistant paper.

20-11-016 | \$14.95 | [PURCHASE](#)

Northern New England G1 Map

ISBN: 9780984013739. 2016. In English. 1 sheet.

Butler Motorcycle Maps identify the most dramatic and thrilling rides in each state. The experts at Butler have ridden and researched each and every road segment detailed on these maps. No matter what you ride, from sport bike enthusiast to dual sport adventurer, chopper rider to two up tourers, the Butler team has you covered. The best segments of road in the state are rated from G1 to G3, providing focused information about the riding experience. The rating system is based on features such as high mountain passes, deep canyons, sweepers, switchbacks, twisties, and remarkable scenery. The rides designated as Lost Highways are stretches of road that seem lost in time. Traveling through untouched landscapes void of population, the roads' faded centerlines and crumbling shoulders are the only remnants of a purposeful past. The Paved Mountain Trails are paths of pavement through remote forests and mountain ranges. All exceptionally tight, twisty, and remote, these stunning routes have even the most seasoned riders coming back for more. The map includes segments in NY, VT, NH, ME and MA.
